

Utterly Gutterly

With Julie Brown, director of Sheffield's Seamless Gutter Company

ALUMINIUM seamless guttering

Ray: "My new guttering looks so much better"

Old leaky guttering is unsightly and can cause serious damage to your home if it is not replaced. Aluminium seamless gutters will not rot like wood, or leak and discolour like plastic - as Ray Drury has discovered

It never rains but it pours in Sheffield. Which is why you need to look closely at your guttering, writes Julie Brown. If it is leaking, costly damage can be caused to your property.

Our aluminium guttering is deeper and wider than other kinds, and therefore able to cope with the monsoon-type storms we have these days.

We recently fitted it to Ray Drury's home in Normanton Springs, where he has lived since his house was built 36 years ago. It still had the original guttering.

Ray called us after reading an article in *Grapevine*. He says: "My old guttering was not leaking, but it looked tired. I liked the idea of seamless aluminium because it looks so much better than normal guttering. There are no unsightly joints and fastenings.

"I was really impressed with the prompt and efficient service I received from The Seamless Gutter Company. The job was finished in half a day. All the old guttering was disposed of, and there was no mess left behind. The workmen even laid boards across the front lawn to protect it from damage by the ladder platforms".

Aluminium gutters are light, and more durable than other forms of guttering. Cast iron is prone to rusting and cracking. Wooden guttering rots if not treated properly, and needs regular maintenance/painting. Plastic guttering is relatively cheap and effective, but if not fitted properly it will leak when its

joints creep open. Also, the colour is likely to fade.

Our aluminium gutters are made-to-measure on site, using a machine housed in the back of one of our vans. The long, continuous gutter runs are strong and visually appealing because we use internal fixing brackets. Seamless aluminium gutters are five inches wide, as opposed to the four-inch width of plastic varieties, so they so can carry much more rainwater.

Our gutters are available in a range of pre-painted colours. The only attention they need is an occasional clear-out of leaves and debris.

The Seamless Gutter Company is a family business run by director Julie Brown and her husband Glen. He leads the installation team, and has over 15 years' experience of fitting guttering.

The continuous aluminium gutter system is approved by the British Board of Agrément, and has a life expectancy of at least 30 years. Please ring for a no-obligation quotation/demonstration.

Good looking gutters. No fixing brackets can be seen

OUR ROOFING DIVISION

Seamless Gutters specialised roofing team can undertake all aspects of roofing from minor repairs and weather damage through to a full re-roof. Please contact us to discuss your requirements
