

Utterly Gutterly

With Julie Brown, director of Sheffield's Seamless Gutter Company

GREEN ALUMINIUM seamless guttering

Old, leaky guttering is unsightly and can cause serious damage to your home if it is not replaced. But aluminium seamless gutters will not rot like wood, or leak/discolour like plastic. And they are green as can be - being 99% recyclable

Our seamless aluminium gutters are light, beautiful and more durable than any other forms of guttering. They are also the most environmentally friendly, because aluminium is 99% recyclable.

The aluminium we use comes from a manufacturer who uses water-generated power to supply the processing facilities, resulting in virtually no CO₂ emissions.

Aluminium is not only planet-friendly, it is more effective than alternatives. Cast-iron is prone to rusting and cracking, wooden guttering rots if not treated properly, and needs regular maintenance/painting. Plastic guttering is relatively cheap and effective, but if not fitted properly it will leak - the joints will creep open and the colour is likely to fade.

The longer leaky guttering is left unrepaired, the more expensive a problem it can become. Now is the perfect time to replace your gutters, before global cooling takes effect (winter, in other words).

We form our aluminium gutters on site, using a machine housed in the back of one of our vans. The finished gutters appear in continuous runs, and because we use internal fixing brackets they are both strong and visually appealing.

Seamless aluminium gutters are five inches wide, as opposed to the four-inch width of plastic varieties, and so can carry much more rainwater.

The gutters are available in a range of pre-painted colours. The only attention they need is an occasional clear-out of the leaves and debris which collects over time.

Go green - go aluminium.

A FEW OF OUR SATISFIED CUSTOMERS

Malcolm Crehan, of Southbourne Court, Dore

"I was surprised that plastic and aluminium guttering are much the same in price. We obtained quotes from four other other firms, but the Seamless Gutter Company was the most competitive."

"They were efficient and punctual, and completed the work with a minimum of disturbance to residents."

Robert and Pippa Proctor, of Eckington

"The Seamless Gutter Company were brilliant."

They did a great job, were punctual, clean and tidy. Our house looks great, and we don't have to worry

about painting gutters and woodwork in the future."

Brian Higgott, of Totley (left), is pictured with Glen, of the Seamless Gutter Company. Says Brian: *"I am very happy with the work that the Seamless Gutter Company have done. My gutter was old, and leaking onto walls. I wanted the problem solved because I knew the longer I left it the more serious the damp would become."*

"My new guttering is trouble-free, leak-free and looks great. I didn't bother getting any other quotes for the work because Glen and the Seamless Gutter Company were obviously trustworthy."

OUR ROOFING DIVISION

Seamless Gutters specialised roofing team can undertake all aspects of roofing from minor repairs and weather damage through to a full re-roof. Please contact us to discuss your requirements
